

Universal Achieves Cisco's Unified Computing Certification

November 5th, 2008

Universal e-Business Solutions Achieves Advanced Technology Partner Specialization from Cisco in the US

Cisco recognizes Universal as exceptionally qualified in Data Center Technologies with UCS

New York, NY – November 5th, 2008 – Universal e-Business Solutions announced today that it has been selected as a Cisco Advanced Technology Partner for Unified Computing Solutions (UCS). This specialization recognizes Universal as having fulfilled the training requirements and program prerequisites to properly sell, design, install and support Cisco's latest data center solution – UCS.

Cisco recognizes this as an outstanding accomplishment for Universal as it demonstrates a strong desire to develop expertise in the new world of complex networking and computing technologies.

"Achieving Cisco's UCS certification is great for Universal's customers," said Anu Bhartiya, Managing Director of Universal e-Business Solutions. "With our previously announced Advanced Date Center Networking Infrastructure certification, UCS certification demonstrates our absolute commitment to the Data Center space and strong desire to deliver more complete solutions."
